A Fixed designs under the original three full-service gates

	Capture / recovery	Repeated contact	Radio gap
Parent: volatile / 3.2 V / holder off	**FAIL** RX 1/3	**FAIL** RX 5/7	**FAIL** RX 1/3
Persistence only / 3.2 V / holder off	**FAIL** RX 1/3	**FAIL** RX 5/7	**FAIL** RX 1/3
Holder-only fixed deletion	**FAIL** RX 1/3	**FAIL** RX 5/7	**FAIL** RX 1/3
Original complete reference	**PASS** RX 3/3	**PASS** RX 7/7	**PASS** RX 3/3
Same reference, clear never	**FAIL** RX 3/3	**FAIL** RX 3/7	**FAIL** RX 3/3
Persistence + 1.9 V / holder off	**PASS** RX 3/3	**PASS** RX 7/7	**PASS** RX 3/3
1.9 V only / volatile / holder off	**FAIL** RX 1/3	**FAIL** RX 5/7	**FAIL** RX 1/3
Saved G proposal, executed unchanged	**PASS** RX 3/3	**PASS** RX 7/7	**PASS** RX 3/3

Two legal success routes

- Persistence + earlier startup passes with holder off.
- The saved G proposal passes with its original full design.

6 new complete inputs
0 new model requests

Rows 1–6 reuse retained results. Rows 7–8 are the six new counterfactual executions. G proposed the numerical equivalent of the reference; this is a recovered proposal evaluation, not a new model episode.

Fixed design neighborhood only.
No global necessity claim.
